

Museum collections are at serious risk!

Written by ICCROM

Wednesday, 20 July 2011 06:54 - Last Updated Wednesday, 20 July 2011 07:03

An estimated 60% of the world's collections in storage are inaccessible and deteriorating rapidly

If you work in a museum, take 10 minutes to answer this survey for the chance to win a one-year subscription to UNESCO's *MUSEUM International* magazine.

Privacy statement: Any information collected in this survey is for statistical purposes only. Our aim is to obtain a global picture of storage; individual results will not be disclosed, published or shared.
